

Subject Code : Hom UG-OM-I Organon of Medicine and
Homoeopathic Philosophy, and Fundamentals of Psychology

INTRODUCTION

Organon of Medicine with Homoeopathic Philosophy is a central fulcrum around which education and training of a homoeopathic physician revolves. It lays down the foundations of homoeopathic practice education, training and research. It defines the qualities of a healer, guides the homoeopathic physician in inculcating values and attitude and develop skills.

Philosophically, it connects man and his actions to the dynamic forces available in nature, thus bringing to fore the holistic approach. Organon orients the students to homoeopathy as an Art and Science. Its comprehensive understanding needs a core competency in logic and the concepts of generalization and individualization.

The biggest challenge in teaching-learning of organon is to first understand the fundamentals according to the Master's writing and then demonstrate them in practice.

This is an opportunity for a homoeopath to connect the current advances while relating with the fundamental laws. Mastering all this will make student a master healer and will move him towards higher purpose of existence.
